

**FACULTY OF BUSINESS & ECONOMICS** 

# **ECONOMICS**

Economics is the study of how choices made by individuals, business firms, governments, and other organizations determine the way a society's resources are used.

Economics will help you understand how markets work, how choices and tradeoffs are made in the face of limited resources, and how the 7 (es) 10 how 1 0 0 1(r) 6.7 n4taBnd6.7T0 u(d6.7TBn) 13.4 (i) 12.6 (c) -2.3.6 (c) 10 u3.3 (hoBn) 13.4 h9.

An economics degree will provide you with more than an understanding of how markets and economies function. It will teach you how to systematically analyze a wide range of social issues using theory and data, and will provide you with insights into a number of questions involving politics, law, history, environment, development and resource use.

At The University of Winnipeg, an Economics degree means getting ready for the future, offering students a range of flexible skills that helps them to grow.

This program leads to a **Bachelor of Arts degree (3-year, 4-year, or Honours) with a Major in Economics.** Students taking an undergraduate degree in another Major may choose to add a **Minor** in Economics as a secondary area of interest.

## **SAMPLE CAREERS**

Economics graduates find work in business, government, banking, or international organizations. Many who go on to graduate work are attracted to teaching, independent consulting, or research. Economics is also highly recommended for anyone wishing to enter law, accounting, or business school.

#### **SAMPLE COURSES**

**Introduction to Economics: Micro & Macro** are two first-year courses that look at contemporary economic institutions and the application of economic theory to current Canadian economic problems.

**Environmental Economics** is a second-year course that applies the techniques of micro-economic analysis and energy systems analysis to the interaction of humans and their environment.
